## How to delete imported results before their submission to the FEI

You have just imported a XML result file directly to the FEI Database and you want to erase one of the Event/Competition results before its submission? You need to perhaps make a correction?

**Please note:** once submitted you will not be able to delete the results anymore. The results must be in **imported** status in order to delete them. If you have already **submitted** them, please send an email to [results@fei.org](mailto:results@fei.org).

**Step 1:** If you want to delete all Competition results of an Event, you can do so by clicking on **Delete Results** on the Event Detail Page and then click **OK**.
