How to create a Horse's pedigree on the FEI Database

The Pedigree Management page on the FEI Database will allow for the creation of a horse' ancestry through visual family trees, which will link horses who are born to the same Sire or Dam.

A horse' pedigree can be created or modified via the Horse Pedigree page once a horse has been created on the FEI Database:

Step 4: If you find the horse you searched for you can click on **SELECT**, this will add the horse as the SIRE or DAM on the Pedigree page of your horse in question.

If you are not sure that it is the correct horse, perhaps when many horses have the same name, you can click on **SHOW DETAILS** and some further information is displayed below.

Once the horse is added, you can continue filling in the pedigree.
