How to connect a GPR+ microchip scanner to the FEI HorseApp

You have a GPR+ microchip scanner?

You will use the FEI HorseApp at your next Event to perform the Examination on Arrival?

Below you will find the step-by-step procedure to connect your scanner to the FEI HorseApp

Step 1: Turn on the scanner and make sure the Bluetooth symbol in the top left corner of the screen is flashing.

Please note: if the Bluetooth symbol is not flashing, it might mean that the GPR+ scanner is already connected to another device.

Step 2: On your mobile device, go to **Settings** -> **Bluetooth** and make sure the Bluetooth is ON on your device

iOS devices (iPhones & iPads):   Android devices:

Veterinarians

The mobile device will search for the microchip reader.

Step 3: Select the GPR+ scanner that appears in the list under the name GPR+******.

The scanner is now paried with your device.

Step 4: Open the [FEI HorseApp](#) and login with your FEI credentials. Choose that you wish to **act as a Veterinarian**.
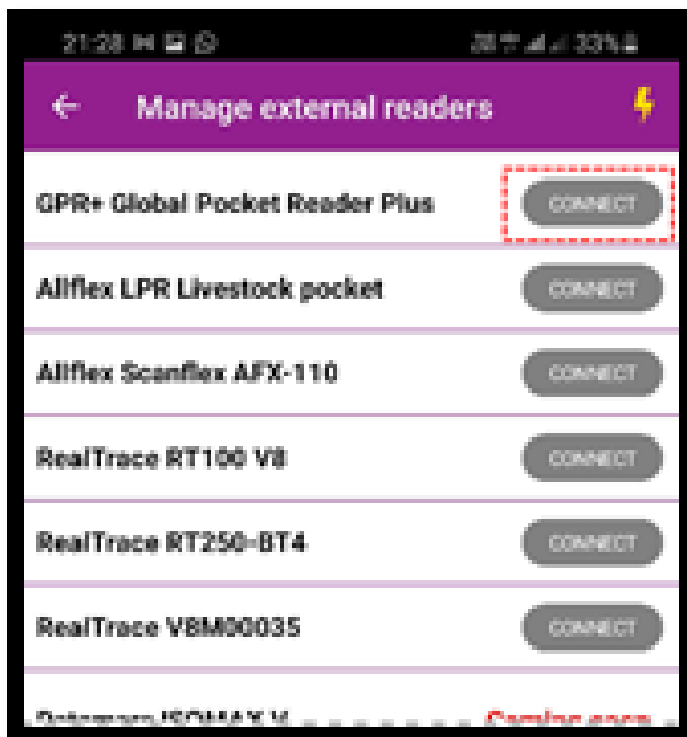

Click on **Not Connected** to connect the GPR+ scanner to the FEI HorseApp.

Horse Search

Advanced search
Search for a horse by name or FEI ID

Scan barcode
Scan a FEI document barcode

Scan microchip
Scan with an external reader

Not connected

Step 5: Locate the GPR+ scanner in the list and click on Connect.

Please note: the first time you connect your GPR+ scanner it might take several minutes or attempts to connect it

Step 6: Once the GPR+ scanner is connected to the FEI HorseApp, the button will turn **green** and the **thunderbolt** logo will also show that you are correctly connected.

Veterinarians

You can use this screen to disconnect your microchip scanner if you wish.

Step 7: You can now proceed with scanning a Horse. The scanner will work whenever it is **connected**.

To scan, search for the horse microchip and press the center button on the GPR+ scanner. The horse' profile will open on the FEI HorseApp accordingly.
