# How to connect a AFX-110 microchip scanner to the FEI HorseApp

You have a AFX-110 microchip scanner?

You will use the FEI HorseApp at your next Event to perform the Examination on Arrival?

Below you will find the step-by-step procedure to connect your scanner to the FEI HorseApp

**Step 1:** Turn on the scanner and press the right-hand button to bring up the main menu:

- scroll down to the **Bluetooth** settings
- press the left-hand button
- press the right-hand button to scroll down to **Select device** -> press the left-hand button

- press the right-hand button to scroll down to **Slave** -> press the left-hand button

The scanner will return to the main page with the **Bluetooth** sign flashing.

**Step 2:** On your mobile device, go to **Settings** -> **Bluetooth** and make sure the Bluetooth is ON on your device

iOS devices (iPhones & iPads):                                    Android devices:

The mobile device will search for the microchip reader.

**Step 3:** Select the AFX-110 scanner that appears in the list under the name AFX110******yan

The scanner is now paried with your device.

**Step 4:** Open the FEI HorseApp and login with your FEI credentials. Choose that you wish to **act as a Veterinarian**.

Click on **Not Connected** to connect the AFX-110 scanner to the FEI HorseApp.
