How to connect an AVID microchip scanner to the FEI HorseApp

You have an AVID microchip scanner?

You will use the FEI HorseApp at your next Event to perform the Examination on Arrival?

Below you will find the step-by-step procedure to connect your scanner to the FEI HorseApp.

Step 1: Set the AVID scanner to **Pair** mode with the Bluetooth interface mode change card.

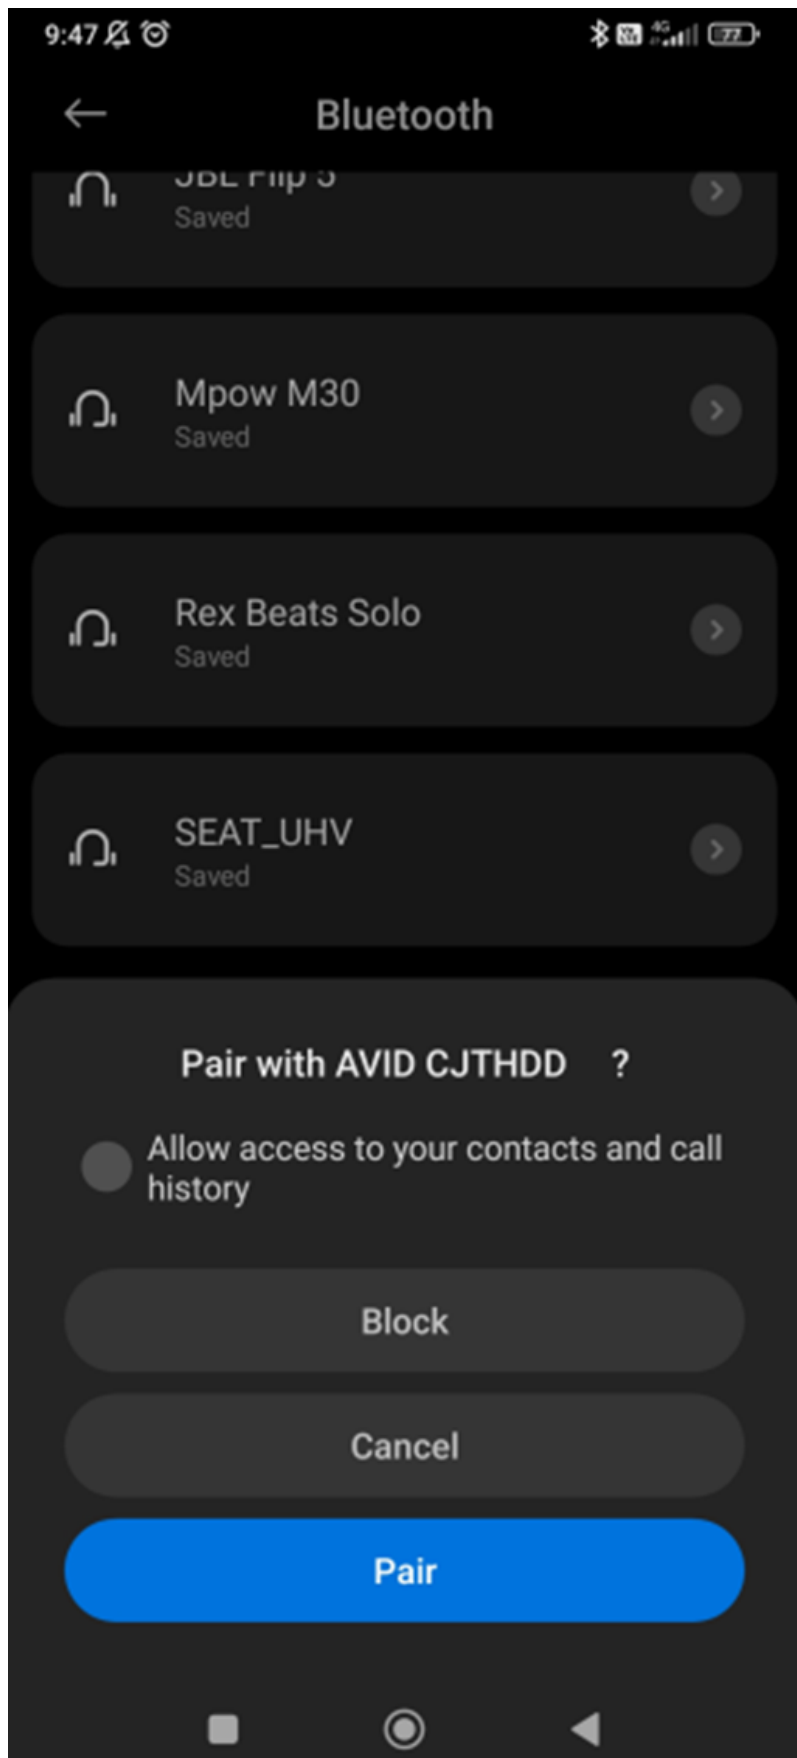

Step 2: Open Bluetooth on your phone and search for devices.

Step 6: Click on the **thunderbolt** logo on the top right-hand side to connect the scanner with the FEI HorseApp.

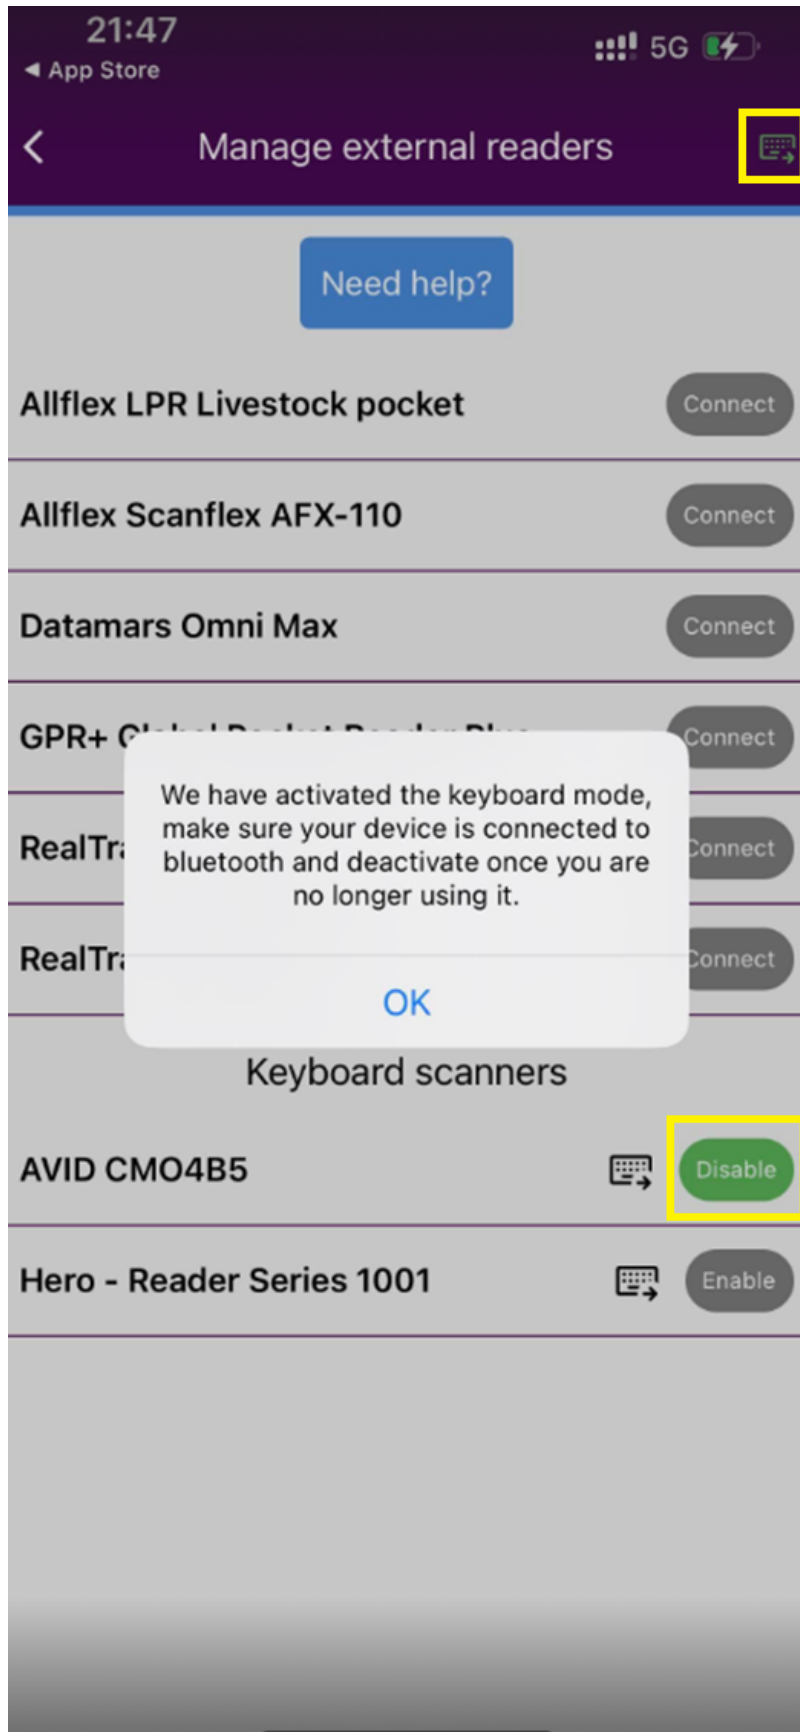

Step 7: Locate the AVID scanner on the Keyboard Type scanner list and press **Enable**.

Veterinarians

Step 8: Once the AVID scanner is connected to the FEI HorseApp, the button will turn **green** and the **thunderbolt** logo will also show that you are correctly connected.

Veterinarians

Step 9: You can now proceed with scanning a Horse. To scan, place the scanner on the Horse microchip and press the read button on the AVID scanner.

Veterinarians

Please note that a keyboard type scanner will work in a different way than the other type of scanners.

For FEI Veterinarians only:

Step 1: Once connected you will need to press the "Scan Horse Microchip" button.

Step 2: A pop-up window will open. You can scan the microchip on the Horse and wait for the number to appear on the field.

Step 3: Press **OK**.
