How to change a microchip number for a horse on the FEI Database

If a horse acquires a new microchip because the previous one cannot be found or read, the information needs to be updated on both the FEI Database as well as in the FEI document.

If a microchip has been incorrectly entered on the FEI Database and in the FEI document, this needs to be corrected accordingly.

Step 1: The [Microchip Changes document](#) needs to be filled out by a Vet and sent to the FEI.

Forms can be sent to: passport@fei.org

Step 2: The information will be changed on the FEI Database and a new sticker #1 containing the updated microchip number will be sent to you by email to be stuck and stamped on the FEI document.

The sticker #1 needs to be stuck and stamped by the National Federation.

Step 3: Once the sticker has been placed on the FEI document a new scan of page 1 (name page) will need to be uploaded to the FEI Database.
