

Horses

What to be aware of for the 1st January 2017

Certain changes will come into effect as of the 1st January 2017 in regards to horse documents and uploads to the FEI Database.

STILL THE SAME:

1) It will still be necessary to upload scans/photos of certain pages of a horse' identification document when FEI ID Registration numbers are upgraded to FEI Passports or FEI Recognition Cards.

2) It will still be necessary to upload scans/photos of certain pages of a horse' identification document when changes are made to existing documents.

Click here for full details: ["Which pages of the horse' identification document need to be uploaded on the FEI Database?"](#)

WHAT IS NEW:

1) All horses that are created on the FEI Database for the first time will require scans/photos to be uploaded of certain pages of their approved national document.

2) This means that national passports/identification documents need to be approved by the FEI. Click here for more details: ["Which national passports are approved by the FEI."](#)

3) If your National Federation does not have a national passport or identification document, we can provide you with a template to create one. Click here for more details: ["How to create a National Passport."](#)

FURTHER INFORMATION:

Please browse our [Horse HowTo section](#) for further information and answers to your questions.
